Comments

Please list things which could be improved.

- feedback methods were sometimes just used to fill the time, maybe for the next seminar try to use them in a more senseful way, so the students know why they do the ”wrap up task”
- I strongly disagree with obligatory tasks such as coming up with a 100 words long question.
- please don’t interrupt student presentations - it’s kind of impolite
- question about the chapters (sometimes hard to write a question because they develop in class when the phenomena are applied and not only shown/presented in theory)

Please list things you liked in this course.

- a fun and good teacher
- activating style of teaching
- activities (getting up, showing, group work)
- Each session helped to get rid of questions I had after reading the text.
- good atmosphere
- good preparation of the sessions
- lessons were fun
- many different methods of feedback
- Some exercises were really fun and engaging.
- student orientated (not too much teacher talking-time)
