Comments

Please list things which could be improved.

- It is not easy to read each empirical paper each week as if you only read it (without understanding everything)you spend quite a long time on it but in the end all the papers were quite hard to understand.
- maybe a few more in-class exercises would help to grasp the matters even better
- Maybe the texts should be shortened and easier to understand for the students.
- readings are hard to understand (sometimes)
- Sometimes I have just read the text because I had to ask a question and not because I wanted to read the text.

Please list things you liked in this course.

- clear instructions
- good structure
- I felt like there's a huge discrepancy regarding the basic readings and the empirical readings, i.e. the basic readings are far too easy. I had expected to learn more complicated issues.
- I liked the idea of presenting a topic with a partner as my partner and I spend a lot of time on it to understand everything and then it was very interesting.
- I liked the possibility to provide questions, which will then be discovered in class.
- interesting approach to grammar
- It's good to discuss different approaches.
- most of the time the topics were really interesting
