Comments

Please list things which could be improved.

- It was a pity that only a few students took part in it. I do not really know how one could attract more students for this seminar, but hopefully there will be more participants in the future (due to that the working atmosphere suffered, exercises could not be executed, discussion was difficult). (3)
- The lecturer often wanted to include interactive activities, but this was often not possible due to the small group.

Please list things you liked in this course.

- different practical activities to understand the theory is always great and something to remember (2)
- Every meeting was well prepared by the lecturer. (2)
- All in all I liked the seminar very much.
- It is good that there is always time for further questions students may have or for discussions that are necessary, but you always come back to your plan for the lesson and do not loose into fetched discussions.
- The exercises were never boring or too hard.
